

KDR2 split base plates

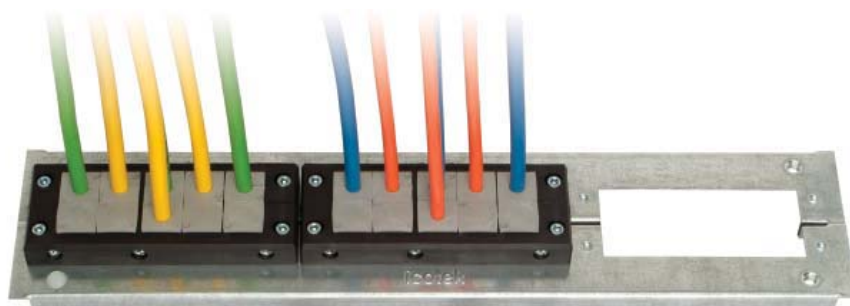

Pat. pend.

2-part base plate with ready-made cut-outs for our cable entry systems KEL and KEL-Jumbo. Fixing holes are equipped with clinch nuts.

- During assembly, almost the whole base of the enclosure can be used for installation of cables.
- Even large connectors can be installed easily.
- Retro-fitting possible without disconnecting of cables. All can be built around the cables. No production downtimes!
- No sheet metal work for the user, the major task can be focused on.
- Cut-outs, which are no longer required, are covered with metal blind plates BPM (page 6).
- The base plate is available for all prevalent enclosures (e.g. Rittal TS8).

The frame-parts with inserts have to be built up before final assembly, i.e. before screwing together the system.

Screwing of the cable entry frames tightens both parts of the split base plate.

KDR2 split base plates

Enclosure-type	Enclosure width in mm	Total length base plate in mm	Sight size of the base plate opening in mm	Number of possible cable entries			Order No.
				Jumbo 1	Jumbo 2	KEL 24/...

* in case both fields of the control cabinet are equipped, 2 complete split base plates are necessary.

KEL-Quick System can not be assembled on the split base plates.
